PROFESSIONAL OBJECTIVE

Accomplished software developer with 3 years of experience building scalable web and desktop applications using the Microsoft technology stack. Passionate about applying agile methodologies to deliver innovative and user-centric solutions.

SKILLS

-
- **Programming languages:** C#, VB.NET, SQL
 - **Web development:** ASP.NET (Web Forms, MVC, .Net Core 7), Blazor, Razor Pages, React JS, HTML, CSS, Bootstrap, JQuery, Web API (Restful API)
 - **Desktop development:** WinForms
 - **Databases:** Microsoft SQL Server, MySQL, SQLite
 - **Other:** Version Control (Git), SOLID Principles, SAP Crystal Reports, LINQ, EF Core, Dev Express (Reports, other components), IT Support, Networking (LAN, WAN)

EXPERIENCE

Systems Analyst (Full-Time)

Comarsoft Solutions (Pvt) Ltd, 03/2022 – Present

- Spearheaded the design, development, deployment and implementation of the web-based pensions administration system, catering to over 300 members, facilitating the upload of over 1,000 monthly contributions, and processing more than 100 monthly claims for various schemes.
- Built a client portal enabling pensioners, members, and employers to track contributions and claims in real-time, enhancing transparency and user experience.
- Managed comprehensive disaster recovery plans, including database backup, restore, mirroring, and log shipping.
- Developed an ASP.NET Web API and interactive online life assurance portal, empowering clients and agents with convenient access to personal and policy information, revolutionizing user engagement and service accessibility.
- Provide ongoing technical support and troubleshooting to clients, ensuring timely resolution of issues and a positive user experience

Junior Software Developer / QA Tester (Internship/Part-Time)

Escrow Systems (Pvt) Ltd, 03/2020 – 11/2021

- Designed and deployed a USSD application for a Ugandan trading company, reducing operational errors by 40%
- Collaborated with two software developers to create a credit management system for a local bank in Zimbabwe. The system currently processes over 100 loans monthly.
- Optimized a USSD application by replacing hardcoded SQL queries with stored procedures, boosting security and application speed by 50%.
- Rigorously tested 10+ web systems, ensuring software quality and user satisfaction
- Developed modules and provided technical support for broker office systems, achieving 80% client satisfaction.
- Provided first-line technical support to users, diagnosing issues and offering clear solutions

EDUCATION

University of Zimbabwe, 02/2018 – 03/2022

- Bachelor of Science Honors Degree in Computer Science, Upper Second Class (2.1)
